Red Hat Enterprise Linux Release 9.2 Manual Pages on 'semanage-boolean.8' command

$ man semanage-boolean.8

semanage-boolean(8)   semanage-boolean(8)

NAME

    semanage-boolean - SELinux Policy Management boolean tool

SYNOPSIS

    semanage boolean [-h] [-n] [-N] [-S STORE] [--extract | --deleteall |

    --list [-C] | --modify (--on | --off) boolean]

DESCRIPTION

    semanage is used to configure certain elements of SELinux policy with?

    out requiring modification to or recompilation from policy sources.

    semanage boolean command controls the settings of booleans in SELinux

    policy.   booleans are if-then-else rules written in SELinux Policy.

    They can be used to customize the way that SELinux Policy rules effect

    a confined domain.

OPTIONS

    -h, --help

        show this help message and exit

    -n, --noheading

        Do not print heading when listing the specified object type

    -N, --noreload

        Do not reload policy after commit

    -S STORE, --store STORE

        Select an alternate SELinux Policy Store to manage

    -C, --locallist

List local customizations

-m, --modify

Modify a record of the specified object type

-l, --list

List records of the specified object type

-E, --extract

Extract customizable commands, for use within a transaction

-D, --deleteall

Remove all local customizations

-1, --on

Enable the boolean

-0, --off

Disable the boolean

EXAMPLE

Turn on the apache can send mail boolean

semanage boolean -m --on httpd_can_sendmail

List customized booleans

semanage boolean -l -C
