Red Hat Enterprise Linux Release 9.2 Manual Pages on 'setenforce.8' command

\$ man setenforce.8

setenforce(8) SELinux Command Line documentation setenforce(8)

NAME

setenforce - modify the mode SELinux is running in

SYNOPSIS

setenforce [Enforcing|Permissive|1|0]

DESCRIPTION

Use Enforcing or 1 to put SELinux in enforcing mode.

Use Permissive or 0 to put SELinux in permissive mode.

If SELinux is disabled and you want to enable it, or SELinux is enabled and you want to disable it, please see selinux(8).

AUTHOR

Dan Walsh, <dwalsh@redhat.com>
