Red Hat Enterprise Linux Release 9.2 Manual Pages on 'seusers.5' command

$ man seusers.5

seusers(5)   SELinux configuration   seusers(5)

NAME

 seusers - The SELinux GNU/Linux user to SELinux user mapping configura?

 tion file

DESCRIPTION

 The seusers file contains a list GNU/Linux user to SELinux user mapping

 for use by SELinux-aware login applications such as PAM(8).

 selinux_usersconf_path(3) will return the active policy path to this

 file. The default SELinux users mapping file is located at:

   /etc/selinux/{SELINUXTYPE}/seusers

 Where {SELINUXTYPE} is the entry from the selinux configuration file

 config (see selinux_config(5)).

 getseuserbyname(3) reads this file to map a GNU/Linux user or group to

 an SELinux user.

FILE FORMAT

 Each line of the seusers configuration file consists of the following:

[%group_id]|[user_id]:seuser_id[:range]

Where:

group_id|user_id

The GNU/Linux user id, or if preceded by the percentage

(%) symbol, then a GNU/Linux group id.

An optional entry set to __default__ can be provided as a

fall back if required.

seuser_id

The SELinux user identity.

range

The optional level or range for an MLS/MCS policy.

EXAMPLE

./seusers

system_u:system_u:s0-s15:c0.c255

root:root:s0-s15:c0.c255

fred:user_u:s0

__default__:user_u:s0

%user_group:user_u:s0
