Red Hat Enterprise Linux Release 9.2 Manual Pages on 'showfigfonts.6' command

\$ man showfigfonts.6

SHOWFIGFONTS(6) Games Manual SHOWFIGFONTS(6)

NAME

showfigfonts - prints a list of available figlet fonts

SYNOPSIS

showfigfonts [-d directory] [word]

DESCRIPTION

Prints a list of available figlet fonts, along with a sample of each font. If directory is given, lists fonts in that directory; otherwise uses the default font directory. If word is given, prints that word in each font; otherwise prints the font name.

EXAMPLES

To use showfigfonts with its default settings, simply type

```
example% showfigfonts
```

To print all the fonts in /usr/share/fonts/figlet

```
example% showfigfonts -d /usr/share/fonts/figlet
```

To print the word foo using all available fonts

```
example% showfigfonts foo
```

AUTHORS

showfigfonts was written by Glenn Chappell <ggc@uiuc.edu>

This manual page was written by Jonathon Abbott for the Debian Project.
