## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'sliceprint.1' command***

***\$ man sliceprint.1***

SLICEPRINT(1)                    SLICEPRINT                    SLICEPRINT(1)

### NAME

sliceprint - slice documents with long lines.

### SYNOPSIS

sliceprint [-ofile] [enscript\_options] [files]

### DESCRIPTION

Sliceprint is a wrapper around the enscript(1) --slice option. Output slices are written to file.1, file.2 and so on.

### SEE ALSO

enscript(1)
