**\$ man systemd-integritysetup-generator.8**

SYSTEMD-INTEGRITYSETUP-systemd-integritysetSYSTEMD-INTEGRITYSETUP-GENERATOR(8)

### NAME

systemd-integritysetup-generator - Unit generator for integrity  
protected block devices

### SYNOPSIS

/usr/lib/systemd/system-generators/systemd-integritysetup-generator

### DESCRIPTION

systemd-integritysetup-generator is a generator that translates  
/etc/integritytab entries into native systemd units early at boot. This  
will create systemd-integritysetup@.service(8) units as necessary.

systemd-integritysetup-generator implements systemd.generator(7).
