**`$ man systemd-update-utmp-runlevel.service.8`**

SYSTEMD-UPDATE-UTMP.SERVICsystemd-update-utmp.seSYSTEMD-UPDATE-UTMP.SERVICE(8)

### NAME

systemd-update-utmp.service, systemd-update-utmp-runlevel.service,  
systemd-update-utmp - Write audit and utmp updates at bootup, runlevel  
changes and shutdown

### SYNOPSIS

systemd-update-utmp.service

systemd-update-utmp-runlevel.service

/usr/lib/systemd/systemd-update-utmp

### DESCRIPTION

systemd-update-utmp-runlevel.service is a service that writes SysV  
runlevel changes to utmp and wtmp, as well as the audit logs, as they  
occur. systemd-update-utmp.service does the same for system reboots  
and shutdown requests.

### SEE ALSO

systemd(1), utmp(5), auditd(8)
