## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'tipc-socket.8' command***

***\$ man tipc-socket.8***

TIPC-SOCKET(8)                      Linux                      TIPC-SOCKET(8)

### NAME

tipc-socket - show TIPC socket (port) information

### SYNOPSIS

tipc socket list

### OPTIONS

Options (flags) that can be passed anywhere in the command chain.

-h, --help

Show help about last valid command. For example tipc socket

--help will show socket help and tipc --help will show general

help. The position of the option in the string is irrelevant.

### DESCRIPTION

A TIPC socket is represented by an unsigned integer.

#### Bound state

A bound socket has a logical TIPC port name associated with it.

#### Connected state

A connected socket is directly connected to another socket cre?

ating a point to point connection between TIPC sockets. If the

connection to X was made using a logical port name Y that name

will show up as connected to X via Y

### EXIT STATUS

Exit status is 0 if command was successful or a positive integer upon

failure.
