Red Hat Enterprise Linux Release 9.2 Manual Pages on 'tracker3-index.1' command

$ man tracker3-index.1

TRACKER3-INDEX(1)   Tracker manual   TRACKER3-INDEX(1)

NAME

    tracker3-index - Index content using the Tracker filesystem miner

SYNOPSIS

    tracker3 index

    tracker3 index --add [--recursive] <dir> [[dir] ...]

    tracker3 index --remove <path> [[dir] ...]

DESCRIPTION

    This command causes the Tracker filesystem miner to process the given

    directories. These changes are persistent across future restarts.

    If invoked without arguments, the currently indexed locations will be

    listed.

SEE ALSO
