

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'unicode_stop.1' command

\$ man unicode_stop.1

UNICODE_STOP(1) General Commands Manual UNICODE_STOP(1)

NAME

unicode_stop - revert keyboard and console from unicode mode

SYNOPSIS

unicode_stop

DESCRIPTION

The unicode_stop command will more-or-less undo the effect of unicode_start. It puts the keyboard in ASCII (XLATE) mode, and clears the console UTF-8 mode.
