Rocky Enterprise Linux 9.2 Manual Pages on command 'addgnupghome.8'

$ man addgnupghome.8

ADDGNUPGHOME(8)   GNU Privacy Guard 2.2   ADDGNUPGHOME(8)

NAME

    addgnupghome - Create .gnupg home directories

SYNOPSIS

    addgnupghome account_1 account_2...account_n

DESCRIPTION

    If GnuPG is installed on a system with existing user accounts, it is

    sometimes required to populate the GnuPG home directory with existing

    files.   Especially a ?trustlist.txt? and a keybox with some initial

    certificates are often desired. This script helps to do this by copy?

    ing all files from ?/etc/skel/.gnupg? to the home directories of the

    accounts given on the command line. It takes care not to overwrite ex?

    isting GnuPG home directories.

    addgnupghome is invoked by root as:

      addgnupghome account1 account2 ... accountn

GnuPG 2.3.3   2021-10-06   ADDGNUPGHOME(8)
