Rocky Enterprise Linux 9.2 Manual Pages on command 'at.allow.5'

$ man at.allow.5

AT.ALLOW(5)   Linux Programmer's Manual   AT.ALLOW(5)

NAME

    at.allow, at.deny - determine who can submit jobs via at or batch

DESCRIPTION

    The /etc/at.allow and /etc/at.deny files determine which user can sub?

    mit commands for later execution via at(1) or batch(1).

    The format of the files is a list of usernames, one on each line.

    Whitespace is not permitted.

    If the file /etc/at.allow exists, only usernames mentioned in it are

    allowed to use at.

    If /etc/at.allow does not exist, /etc/at.deny is checked, every user?

    name not mentioned in it is then allowed to use at.

    An empty /etc/at.deny means that every user may use at.

    If neither exists, only the superuser is allowed to use at.

SEE ALSO

    at(1), cron(8), crontab(1), atd(8).
