Rocky Enterprise Linux 9.2 Manual Pages on command 'buildah-rm.1'

\$ man buildah-rm.1

buildah-rm(1) General Commands Manual buildah-rm(1)

NAME

buildah-rm - Removes one or more working containers.

SYNOPSIS

buildah rm [container ...]

DESCRIPTION

Removes one or more working containers, unmounting them if necessary.

OPTIONS

--all, -a

All Buildah containers will be removed. Buildah containers are denoted with an '*' in the 'BUILDER' column listed by the command 'buildah containers'. A container name or id cannot be provided when this option is used.

EXAMPLE

buildah rm containerID

buildah rm containerID1 containerID2 containerID3

buildah rm --all
