\$ man cyrusdb2current.8

CYRUSBDB2CURRENT(1) User Contributed Perl Documentation CYRUSBDB2CURRENT(1)

NAME

cyrusdb2current - command-line utility converting the SASLDB database from BerkeleyDB to the database format currently used by sasldb.

SYNOPSIS

```
cyrusdb2current <sasldb_old_path> <sasldb_new_path>
```

DESCRIPTION

cyrusdb2current converts the current sasldb database from BerkeleyDB format to the currently used database format. It is STRONGLY RECOMMENDED to make a backup of the current database before the conversion.

We expect that the old path is /etc/sasldb2 and the new one is /etc/sasl2/sasldb2
