Rocky Enterprise Linux 9.2 Manual Pages on command 'fc-match.1'

$ man fc-match.1

FC-MATCH(1)   FC-MATCH(1)

NAME

    fc-match - match available fonts

SYNOPSIS

    fc-match [-asvVh] [--all] [--sort] [--verbose] [[-f for?

    mat] [--format format]] [--version] [--help]

    [pattern [element...]]

DESCRIPTION

    fc-match matches pattern (empty pattern by default) using the normal

    fontconfig matching rules to find the best font available. If --sort is

    given, the sorted list of best matching fonts is displayed. The --all

    option works like --sort except that no pruning is done on the list of

    fonts.

    If any elements are specified, only those are printed. Otherwise short

    file name, family, and style are printed, unless verbose output is re?

    quested.

OPTIONS

    This program follows the usual GNU command line syntax, with long op?

tions starting with two dashes (`-'). A summary of options is included below.

-a   Displays sorted list of best matching fonts, but do not do any pruning on the list.

-s   Displays sorted list of best matching fonts.

-v   Print verbose output of the whole font pattern for each match, or elements if any is provided.

-f   Format output according to the format specifier format.

-V   Show version of the program and exit.

-h   Show summary of options.

pattern

> Displays fonts matching pattern (uses empty pattern by default).

element

> If set, the element property is displayed for matching fonts.

EXAMPLES

fc-match sans

> Display the best matching font categorized into sans-serif generic family, filtered by current locale

fc-match sans:lang=en

> Display the best matching font categorized into sans-serif generic family, filtered by English language

fc-match sans:lang=en:weight=bold

> Display the best matching font categorized into sans-serif generic family, filtered by English language and weight is bold.
