FOOMATIC-PPDFILE(1)   General Commands Manual   FOOMATIC-PPDFILE(1)

NAME

   foomatic-ppdfile - Generate a PPD file for a given printer/driver combo

SYNOPSIS

   foomatic-ppdfile [-w] [-d <driver>] -p <printerid>

   foomatic-ppdfile [-A] [-P pattern]

   foomatic-ppdfile -h

DESCRIPTION

   The first form of the foomatic-ppdfile to compute the spooler-indepen?

   dent Foomatic PPD file for any valid printer/driver combo available in

   the Foomatic database, both for printing with foomatic-rip(1) and for

   applications/clients being able to access the printer's options.   The

   PPD file is returned on standard ouput. If the driver is not speci?

   fied, the default driver is used.

   The second form of the foomatic-ppdfile program will search the printer

   database and return either all printer entries or those whose name

   and/or model information match a regular expression.

   The last form prints a help message and exits.

Options

-d drivername

The (optional) driver name to use. If the driver name is not sup?

plied, the default or first driver in the printers compatible

driver list is used.

-p   printer id The printer id.

-w   Return a PPD file that conforms to the Microsoft Windows format

limitations.

-A   Return all printer entries in the database.

-Ppattern

Return all printer entries in the database which match the regular

expression.

SEE ALSO

foomatic-rip(1)

EXIT STATUS

foomatic-ppdfile returns 0 on success, 1 otherwise.

AUTHOR

Manfred Wassmann <manolo@NCC-1701.B.Shuttle.de> for   the   foomatic

project using output from the associated binary.
