Rocky Enterprise Linux 9.2 Manual Pages on command 'gedit.1'

$ man gedit.1

GEDIT(1)   General Commands Manual   GEDIT(1)

NAME

   gedit - text editor for the GNOME Desktop

SYNOPSIS

   gedit [OPTION...] [FILE...] [+LINE[:COLUMN]]

   gedit [OPTION...] -

DESCRIPTION

   gedit is the official text editor of the GNOME desktop environment.

   While aiming at simplicity and ease of use, gedit is a powerful general

   purpose text editor. It can be used to create and edit all kinds of

   text files.

   gedit features a flexible plugin system which can be used to dynami?

   cally add new advanced features to gedit itself.

OPTIONS

   --encoding

      Set the character encoding to be used for opening the files

      listed on the command line.

   --list-encodings

Display list of possible values for the encoding option and
exit.

--new-window

Create a new toplevel window in an existing instance of gedit.

--new-document

Create a new document in an existing instance of gedit.

-s, --standalone

Run gedit in standalone mode.

-w, --wait

Open files and block the gedit process.

--help Prints the command line options.

--version

Output version information and exit.

FILE   Specifies the file to open when gedit starts. If this is not
specified, gedit will load a blank file with an "Unsaved Docu?
ment" label. Multiple files can be loaded if they are separated
by spaces.   gedit also supports handling of remote files. For
example, you can pass the location of a webpage to gedit , like
"http://www.gnome.org", or load a file from a FTP server, like
"ftp://ftp.gnome.org/robots.txt".

-    gedit will read from stdin

+LINE For the first file, go to the line specified by LINE (do not in?
sert a space between the "+" sign and the number). If LINE is
missing, go to the last line.

COLUMN For the first file, go to the column specified by COLUMN.   If
COLUMN is missing, go to the first column.

BUGS

If you find a bug, please report it at the GNOME bug tracker. See
https://wiki.gnome.org/Apps/Gedit/ReportingBugs.
