Rocky Enterprise Linux 9.2 Manual Pages on command 'genl.8'

$ man genl.8

GENL(8)   Linux   GENL(8)

NAME

   genl - generic netlink utility frontend

SYNOPSIS

   genl [-s[tatistics]] [-d[etails]] [-r[aw]] OBJECT

   genl { -V[ersion] | -h[elp] }

   OBJECT := { ctrl CTRL_OPTS }

   CTRL_OPTS := { help | list | monitor | get PARMS }

   PARMS := { name NAME | id ID }

DESCRIPTION

   The genl utility provides a simple frontend to the generic netlink li?

   brary. Although it's designed to support multiple OBJECTs, for now only

   the ctrl object is available, which is used to query the generic

   netlink controller.

 ctrl

   The generic netlink controller can be queried in various ways:

   help   This command just prints a help text for the ctrl object.

   list   Show the registered netlink users.

monitor

> Listen for generic netlink notifications.

get   Query the controller for a given user, identified either by name

> or id.

OPTIONS

genl supports the following options.

-h, -help

> Show summary of options.

-V, -Version

> Show version of program.

-s, -stats, -statistics

> Show object statistics.

-d, -details

> Show object details.

-r, -raw

> Dump raw output only.
