Rocky Enterprise Linux 9.2 Manual Pages on command 'gtk-launch.1'

$ man gtk-launch.1

GTK-LAUNCH(1)   User Commands   GTK-LAUNCH(1)

NAME

   gtk-launch - Launch an application

SYNOPSIS

   gtk-launch [OPTION...] APPLICATION [URI...]

DESCRIPTION

   gtk-launch launches an application using the given name. The

   application is started with proper startup notification on a default

   display, unless specified otherwise.

   gtk-launch takes at least one argument, the name of the application to

   launch. The name should match application desktop file name, as

   residing in /usr/share/application, with or without the '.desktop'

   suffix.

   If called with more than one argument, the rest of them besides the

   application name are considered URI locations and are passed as

   arguments to the launched application.

OPTIONS

   The following options are understood:

-?, --help

Prints a short help text and exits.

--version

Prints the program version and exits.
