Rocky Enterprise Linux 9.2 Manual Pages on command 'load_policy.8'

$ man load_policy.8

LOAD_POLICY(8)   NSA   LOAD_POLICY(8)

NAME

    load_policy - load a new SELinux policy into the kernel

SYNOPSIS

    load_policy [-qi]

DESCRIPTION

    load_policy loads the installed policy file into the kernel. The ex?

    isting policy boolean values are automatically preserved across policy

    reloads rather than being reset to the default values in the policy

    file.

OPTIONS

    -q   suppress warning messages.

    -i   initial policy load. Only use this if this is the first time

          policy is being loaded since boot (usually called from

          initramfs).

EXIT STATUS

    0   Success

    1   Invalid option

2   Policy load failed

3   Initial policy load failed and enforcing mode requested
