Rocky Enterprise Linux 9.2 Manual Pages on command 'lpq-cups.1'

$ man lpq-cups.1

lpq(1)   OpenPrinting   lpq(1)

NAME

    lpq - show printer queue status

SYNOPSIS

    lpq [-h server[:port]] [-E] [-U username] [-P destination[/in?

    stance]] [-a] [-l] [+interval]

DESCRIPTION

    lpq shows the current print queue status on the named printer.   Jobs

    queued on the default destination will be shown if no printer or class

    is specified on the command-line.

    The +interval option allows you to continuously report the jobs in the

    queue until the queue is empty; the list of jobs is shown once every

    interval seconds.

OPTIONS

    lpq supports the following options:

    -E   Forces encryption when connecting to the server.

    -P destination[/instance]

        Specifies an alternate printer or class name.

-U username

    Specifies an alternate username.

-a   Reports jobs on all printers.

-h server[:port]

    Specifies an alternate server. Note: This option must occur be?

    fore all others.

-l Requests a more verbose (long) reporting format.
