$ man msgunfmt.1

MSGUNFMT(1)   User Commands   MSGUNFMT(1)

NAME

    msgunfmt - uncompile message catalog from binary format

SYNOPSIS

    msgunfmt [OPTION] [FILE]...

DESCRIPTION

    Convert binary message catalog to Uniforum style .po file.

    Mandatory arguments to long options are mandatory for short options

    too.

  Operation mode:

    -j, --java

        Java mode: input is a Java ResourceBundle class

    --csharp

        C# mode: input is a .NET .dll file

    --csharp-resources

        C# resources mode: input is a .NET .resources file

    --tcl Tcl mode: input is a tcl/msgcat .msg file

  Input file location:

FILE ...

   input .mo files

If no input file is given or if it is -, standard input is read.

Input file location in Java mode:

   -r, --resource=RESOURCE

      resource name

   -l, --locale=LOCALE

      locale name, either language or language_COUNTRY

   The class name is determined by appending the locale name to the re?

   source name, separated with an underscore. The class is located using

   the CLASSPATH.

Input file location in C# mode:

   -r, --resource=RESOURCE

      resource name

   -l, --locale=LOCALE

      locale name, either language or language_COUNTRY

   -d DIRECTORY

      base directory for locale dependent .dll files

   The -l and -d options are mandatory. The .dll file is located in a

   subdirectory of the specified directory whose name depends on the lo?

   cale.

Input file location in Tcl mode:

   -l, --locale=LOCALE

      locale name, either language or language_COUNTRY

   -d DIRECTORY

      base directory of .msg message catalogs

   The -l and -d options are mandatory. The .msg file is located in the

   specified directory.

Output file location:

   -o, --output-file=FILE

      write output to specified file

   The results are written to standard output if no output file is speci?

   fied or if it is -.

Output details:

   --color

      use colors and other text attributes always

   --color=WHEN

      use colors and other text attributes if WHEN. WHEN may be 'al?

      ways', 'never', 'auto', or 'html'.

   --style=STYLEFILE

      specify CSS style rule file for --color

   -e, --no-escape

      do not use C escapes in output (default)

   -E, --escape

      use C escapes in output, no extended chars

   --force-po

      write PO file even if empty

   -i, --indent

      write indented output style

   --strict

      write strict uniforum style

   -p, --properties-output

      write out a Java .properties file

   --stringtable-output

      write out a NeXTstep/GNUstep .strings file

   -w, --width=NUMBER

      set output page width

   --no-wrap

      do not break long message lines, longer than the output page

      width, into several lines

   -s, --sort-output

      generate sorted output

Informative output:

   -h, --help

      display this help and exit

   -V, --version

output version information and exit

-v, --verbose

increase verbosity level
