## Rocky Enterprise Linux 9.2 Manual Pages on command 'nmtui-connect.1'

*$ man nmtui-connect.1*

NMTUI(1)                    General Commands Manual                    NMTUI(1)

NAME

    nmtui - Text User Interface for controlling NetworkManager

SYNOPSIS

    nmtui-edit | nmtui edit  {name | id}

    nmtui-connect | nmtui connect  {name | uuid | device | SSID}

    nmtui-hostname | nmtui hostname

DESCRIPTION

    nmtui is a curses?based TUI application for interacting with

    NetworkManager. When starting nmtui, the user is prompted to choose the

    activity to perform unless it was specified as the first argument.

    The supported activities are:

    edit

        Show a connection editor that supports adding, modifying, viewing

        and deleting connections. It provides similar functionality as

        nm-connection-editor.

    connect

        Show a list of available connections, with the option to activate

or deactivate them. It provides similar functionality as nm-applet.

hostname

Set the system hostname.

Corresponding to above activities, nmtui also comes with binaries named nmtui-edit, nmtui-connect, and nmtui-hostname to skip the selection of the activities.
