$ man nvme-micron-nand-stats.1

NVME-MICRON-NAND-(1)   NVMe Manual   NVME-MICRON-NAND-(1)

NAME

    nvme-micron-nand-stats - Retrieves NAND statistics of given micron

    device

SYNOPSIS

    nvme micron vs-nand-stats <device>

DESCRIPTION

    This command prints NAND information (Total bytes written, Bad block

    count and Erase failures etc) for the given micron device.

    The <device> parameter is mandatory and may be either the NVMe

    character device (ex: /dev/nvme0), or a namespace block device (ex:

    /dev/nvme0n1).

    This will only work on Micron devices devices of model numbers 54XX.

    Support for new devices may be added subsequently.

OPTIONS

    None

EXAMPLES

    ? Retrieve NAND statistics information

```
# nvme micron vs-nand-stats /dev/nvme0
```

NVME

    Part of the nvme-user suite
