OSTREE ADMIN INSTUTI(1)   ostree admin instutil   OSTREE ADMIN INSTUTI(1)

NAME

    ostree-admin-instutil - Utility functions intended primarily for

    operating system installation programs

SYNOPSIS

    ostree admin instutil {SUBCOMMAND} [ARGS]

DESCRIPTION

    Use the subcommands to toggle admin installation utilities for selinux

    policies and kernel arguments.

SUBCOMMANDS

    selinux-ensure-labeled [SUBPATH PREFIX]

        Ensure all files and directories are labeled according to SELinux

        policy of the first deployment.

    set-kargs [--merge] [--import-proc-cmdline] [--append="NAME=VALUE"]

            [--replace="NAME=VALUE"] [MORE_APPEND_ARGS]

        Replace the kernel arguments of the default deployment. The new

        arguments are based on an empty list (the default), the current

        options (--merge), or the arguments of the loaded kernel

(--import-proc-cmdline), and new options either are added to the

end (--append="NAME=VALUE") or replace existing arguments of the

same name (--replace="NAME=VALUE").
