***\$ man pdf2ps.1***

PDF2PS(1)                      Ghostscript Tools                      PDF2PS(1)

#### NAME

pdf2ps - Ghostscript PDF to PostScript translator

#### SYNOPSIS

pdf2ps [ options ] input.pdf [output.ps]

#### DESCRIPTION

pdf2ps uses gs(1) to convert the Adobe Portable Document Format (PDF) file "input.pdf" to PostScript(tm) in "output.ps". Normally the output is allowed to use PostScript Level 2 (but not PostScript LanguageLevel 3) constructs; the -dLanguageLevel=1 option restricts the output to Level 1, while -dLanguageLevel=3 allows using LanguageLevel 3 in the output.

#### FILES

Run "gs -h" to find the location of Ghostscript documentation on your

system, from which you can get more details.

## VERSION

This document was last revised for Ghostscript version 9.54.0.

## AUTHOR

Artifex Software, Inc. are the primary maintainers of Ghostscript.
