Rocky Enterprise Linux 9.2 Manual Pages on command 'podman-container-attach.1'

$ man podman-container-attach.1

podman-attach(1)   General Commands Manual   podman-attach(1)

NAME

   podman-attach - Attach to a running container

SYNOPSIS

   podman attach [options] container

   podman container attach [options] container

DESCRIPTION

   podman attach attaches to a running container using the container's

   name or ID, to either view its ongoing output or to control it interac?

   tively.

   The container can be detached from (and leave it running) using a con?

   figurable key sequence. The default sequence is ctrl-p,ctrl-q. Config?

   ure the keys sequence using the --detach-keys OPTION, or specifying it

   in the containers.conf file: see containers.conf(5) for more informa?

   tion.

OPTIONS

  --detach-keys=sequence

   Specify the key sequence for detaching a container. Format is a single

character [a-Z] or one or more ctrl-<value> characters where <value> is

one of: a-z, @, ^, [, , or _. Specifying "" will disable this feature.

The default is ctrl-p,ctrl-q.

This option can also be set in containers.conf(5) file.

  --latest, -l

Instead of providing the container name or ID, use the last created

container.   Note: the last started container could be from other users

of Podman on the host machine. (This option is not available with the

remote Podman client, including Mac and Windows (excluding WSL2) ma?

chines)

  --no-stdin

Do not attach STDIN. The default is false.

  --sig-proxy

Proxy received signals to the container process (non-TTY mode only).

SIGCHLD, SIGSTOP, and SIGKILL are not proxied.

The default is true.

EXAMPLES

Attach to a container called "foobar".

    $ podman attach foobar

Attach to the latest created container.

    $ podman attach --latest

Attach to a container that start with the ID "1234".

    $ podman attach 1234

Attach to a container without attaching STDIN.

    $ podman attach --no-stdin foobar
