**\$ man polkitd.8**

POLKITD(8) polkitd POLKITD(8)

**NAME**

polkitd - The polkit system daemon

## SYNOPSIS

## polkitd

## DESCRIPTION

polkitd provides the org.freedesktop.PolicyKit1 D-Bus service on the system message bus. Users or administrators should never need to start this daemon as it will be automatically started by dbus-daemon(1) or systemd(1) whenever an application calls into the service.

polkitd must be started with superuser privileges but drops privileges early by switching to the unprivileged polkitd system user

See the `polkit(8)` man page for more information

AUTHOR

Written by David Zeuthen <davidz@redhat.com> with a lot of help from  
many others

BUGS

Please send bug reports to either the distribution or the polkit-devel

mailing list, see the link

<http://lists.freedesktop.org/mailman/listinfo/polkit-devel> on how to  
subscribe.
