\$ man putgrent.3

PUTGRENT(3) Linux Programmer's Manual PUTGRENT(3)

NAME

putgrent - write a group database entry to a file

SYNOPSIS

```
#define _GNU_SOURCE       /* See feature_test_macros(7) */  
  
#include <grp.h>  
  
int putgrent(const struct group *grp, FILE *stream);
```

DESCRIPTION

The putgrent() function is the counterpart for fgetgrent(3). The function writes the content of the provided struct group into the stream.

The list of group members must be NULL-terminated or NULL-initialized.

The struct group is defined as follows:

```
struct group {  
    char *gr_name;       /* group name */  
    char *gr_passwd;     /* group password */  
    gid_t gr_gid;       /* group ID */  
    char **gr_mem;       /* group members */  
};
```

RETURN VALUE

The function returns zero on success, and a nonzero value on error.

ATTRIBUTES

For an explanation of the terms used in this section, see at?

tributes(7).
