Rocky Enterprise Linux 9.2 Manual Pages on command 'pw-jack.1'

$ man pw-jack.1

PW-JACK(1)   General Commands Manual   PW-JACK(1)

NAME

    pw-jack - Use PipeWire instead of JACK

SYNOPSIS

    pw-jack [options] COMMAND [FILE]

DESCRIPTION

    pw-jack modifies the LD_LIBRARY_PATH environment variable so that ap?

    plications will load PipeWire's reimplementation of the JACK client li?

    braries instead of JACK's own libraries. This results in JACK clients

    being redirected to PipeWire.

    If PipeWire's reimplementation of the JACK client libraries has been

    installed as a system-wide replacement for JACK's own libraries, then

    the whole system already behaves in that way, in which case pw-jack has

    no practical effect.

OPTIONS

    -h   Show help.

    -r NAME

        The name of the remote instance to connect to. If left unspeci?

fied, a connection is made to the default PipeWire instance.

-v   Verbose operation.

EXAMPLES

pw-jack sndfile-jackplay /usr/share/sounds/freedesktop/stereo/bell.oga

NOTES

Using PipeWire for audio is currently considered to be experimental.

AUTHORS

The   PipeWire   Developers   <?

https://gitlab.freedesktop.org/pipewire/pipewire/issues>; PipeWire is

available from https://pipewire.org
