Rocky Enterprise Linux 9.2 Manual Pages on command 'removable_context.5'

$ man removable_context.5

removable_context(5)   SELinux configuration   removable_context(5)

NAME

removable_context - The SELinux removable devices context configuration

file

DESCRIPTION

This file contains the default label that should be used for removable

devices.

selinux_removable_context_path(3) will return the active policy path to

this file. The default removable context file is:

/etc/selinux/{SELINUXTYPE}/contexts/removable_context

Where {SELINUXTYPE} is the entry from the selinux configuration file

config (see selinux_config(5)).

FILE FORMAT

The file consists of a single line entry as follows:

user:role:type[:range]

Where:

user role type range

A user, role, type and optional range (for MCS/MLS) sepa?

rated by colons (:) that will be applied to removable de?

vices.

EXAMPLE

./contexts/removable_contexts

system_u:object_r:removable_t:s0
