$ man sdiff.1

GNU(1)   User Commands   GNU(1)

NAME

    GNU sdiff - side-by-side merge of file differences

SYNOPSIS

    sdiff [OPTION]... FILE1 FILE2

DESCRIPTION

    Side-by-side merge of differences between FILE1 and FILE2.

    Mandatory arguments to long options are mandatory for short options

    too.

    -o, --output=FILE

        operate interactively, sending output to FILE

    -i, --ignore-case

        consider upper- and lower-case to be the same

    -E, --ignore-tab-expansion

        ignore changes due to tab expansion

    -Z, --ignore-trailing-space

        ignore white space at line end

    -b, --ignore-space-change

ignore changes in the amount of white space

-W, --ignore-all-space

    ignore all white space

-B, --ignore-blank-lines

    ignore changes whose lines are all blank

-I, --ignore-matching-lines=RE

    ignore changes all whose lines match RE

--strip-trailing-cr

    strip trailing carriage return on input

-a, --text

    treat all files as text

-w, --width=NUM

    output at most NUM (default 130) print columns

-l, --left-column

    output only the left column of common lines

-s, --suppress-common-lines

    do not output common lines

-t, --expand-tabs

    expand tabs to spaces in output

--tabsize=NUM

    tab stops at every NUM (default 8) print columns

-d, --minimal

    try hard to find a smaller set of changes

-H, --speed-large-files

    assume large files, many scattered small changes

--diff-program=PROGRAM

    use PROGRAM to compare files

--help display this help and exit

-v, --version

    output version information and exit

If a FILE is '-', read standard input. Exit status is 0 if inputs are

the same, 1 if different, 2 if trouble.
