Rocky Enterprise Linux 9.2 Manual Pages on command 'semanage-export.8'

$ man semanage-export.8

semanage-export(8)   semanage-export(8)

NAME

    semanage-export - SELinux Policy Management import tool

SYNOPSIS

    semanage export [-h] [-S STORE] [-f OUTPUT_FILE]

DESCRIPTION

    semanage is used to configure certain elements of SELinux policy with?

    out requiring modification to or recompilation from policy sources.

    semanage import and export can be used to extract the SELinux modifica?

    tions from one machine and apply them to another. You can put a whole

    group of semanage commands within a file and apply them to a machine in

    a single transaction.

OPTIONS

    -h, --help

        show this help message and exit

    -S STORE, --store STORE

        Select an alternate SELinux Policy Store to manage

    -f OUTPUT_FILE, --output_file OUTPUT_FILE

Output file

EXAMPLE

Import semanage modifications from another machine

semanage export -f semanage.mods

scp semanage.mod remotemachine:

ssh remotemachine

semanage import -f semanage.mods

SEE ALSO

selinux(8), semanage(8), semanage-import(8)
