Rocky Enterprise Linux 9.2 Manual Pages on command 'srand48_r.3'

$ man srand48_r.3

DRAND48_R(3)   Linux Programmer's Manual   DRAND48_R(3)

NAME

    drand48_r,   erand48_r, lrand48_r, nrand48_r, mrand48_r, jrand48_r,

    srand48_r, seed48_r, lcong48_r - generate uniformly distributed pseudo-

    random numbers reentrantly

SYNOPSIS

    #include <stdlib.h>

    int drand48_r(struct drand48_data *buffer, double *result);

    int erand48_r(unsigned short xsubi[3],

            struct drand48_data *buffer, double *result);

    int lrand48_r(struct drand48_data *buffer, long *result);

    int nrand48_r(unsigned short xsubi[3],

            struct drand48_data *buffer, long *result);

    int mrand48_r(struct drand48_data *buffer,long *result);

    int jrand48_r(unsigned short xsubi[3],

            struct drand48_data *buffer, long *result);

    int srand48_r(long int seedval, struct drand48_data *buffer);

    int seed48_r(unsigned short seed16v[3],

```
                struct drand48_data *buffer);

        int lcong48_r(unsigned short param[7],
                struct drand48_data *buffer);
```

   Feature Test Macro Requirements for glibc (see feature_test_macros(7)):

      All functions shown above:

         /* Glibc since 2.19: */ _DEFAULT_SOURCE

            || /* Glibc versions <= 2.19: */ _SVID_SOURCE || _BSD_SOURCE

DESCRIPTION

   These functions are the reentrant analogs of the functions described in
   drand48(3). Instead of modifying the global random generator state,
   they use the supplied data buffer.

   Before the first use, this struct must be initialized, for example, by
   filling it with zeros, or by calling one of the functions srand48_r(),
   seed48_r(), or lcong48_r().

RETURN VALUE

   The return value is 0.

ATTRIBUTES

   For an explanation of the terms used in this section, see at‐
   tributes(7).

```
?????????????????????????????????????????????????????????????????????
?Interface              ? Attribute    ? Value             ?
?????????????????????????????????????????????????????????????????????
?drand48_r(), erand48_r(), ? Thread safety ? MT-Safe race:buffer ?
?lrand48_r(), nrand48_r(), ?              ?                 ?
?mrand48_r(), jrand48_r(), ?             ?                 ?
?srand48_r(), seed48_r(),  ?             ?                 ?
?lcong48_r()            ?         ?             ?         ?
?????????????????????????????????????????????????????????????????????
```

CONFORMING TO

   These functions are GNU extensions and are not portable.
