### ***Rocky Enterprise Linux 9.2 Manual Pages on command 'thin\_ls.8'***

**\$ man thin\_ls.8**

thin\_ls(8)            System Manager's Manual            thin\_ls(8)

#### NAME

thin\_ls - List thin volumes within a pool.

#### SYNOPSIS

thin\_ls [options] {device|file}

#### DESCRIPTION

thin\_ls displays information about thin volumes in a pool. Pass the metadata device on the command line, not the pool device.

This tool cannot be run on live metadata unless the --metadata-snap option is used.

#### OPTIONS

-h, --help

Print help and exit.

-V, --version

Print version information and exit.

-o, --format

Give a comma separated list of fields to be output.

Valid fields are:

DEV, MAPPED\_BLOCKS, EXCLUSIVE\_BLOCKS, SHARED\_BLOCKS, MAPPED\_SECTORS,  
EXCLUSIVE\_SECTORS, SHARED\_SECTORS, MAPPED\_BYTES, EXCLUSIVE\_BYTES,  
SHARED\_BYTES, MAPPED, EXCLUSIVE, SHARED, TRANSACTION, CREATE\_TIME,  
SNAP\_TIME

--no-headers

Don't output headers.

-m, --metadata-snap

Use metadata snapshot.

If you want to get information out of a live pool then you will need to  
take a metadata snapshot and use this switch.
