Rocky Enterprise Linux 9.2 Manual Pages on command 'tipc-peer.8'

$ man tipc-peer.8

TIPC-PEER(8)   Linux   TIPC-PEER(8)

NAME

   tipc-peer - modify peer information

SYNOPSIS

   tipc peer remove address ADDRESS

OPTIONS

   Options (flags) that can be passed anywhere in the command chain.

   -h, --help

      Show help about last valid command. For example tipc peer --help

      will show peer help and tipc --help will show general help. The

      position of the option in the string is irrelevant.

DESCRIPTION

  Peer remove

   Remove an offline peer node from the local data structures. The peer is

   identified by its address

EXIT STATUS

   Exit status is 0 if command was successful or a positive integer upon

   failure.
