Rocky Enterprise Linux 9.2 Manual Pages on command 'tss2_setappdata.1'

\$ man tss2_setappdata.1

tss2_setappdata(1) General Commands Manual tss2_setappdata(1)

NAME

tss2_setappdata(1)

SYNOPSIS

tss2_setappdata [OPTIONS]

SEE ALSO

fapi-config(5) to adjust Fapi parameters like the used cryptographic profile and TCTI or directories for the Fapi metadata storages.
fapi-profile(5) to determine the cryptographic algorithms and parameters for all keys and operations of a specific TPM interaction like the name hash algorithm, the asymmetric signature algorithm, scheme and parameters and PCR bank selection.

DESCRIPTION

tss2_setappdata(1) - This command allows an application to associate an arbitrary data blob with a given object. The data is stored and can be returned with tss2_getappdata. Previously stored data is overwritten by this function. If empty data is passed in, the stored data is deleted.

OPTIONS

These are the available options:

? -p, --path=STRING:

Path of the object for which the appData will be stored.

? -i, --appData=FILENAME or - (for stdin):

The data to be stored. Optional parameter. If omitted, stored data is deleted.

COMMON OPTIONS

This collection of options are common to all tss2 programs and provide information that many users may expect.

? -h, --help [man|no-man]: Display the tools manpage. By default, it attempts to invoke the manpager for the tool, however, on failure will output a short tool summary. This is the same behavior if the ?man? option argument is specified, however if explicit ?man? is requested, the tool will provide errors from man on stderr. If the ?no-man? option is specified, or the manpager fails, the short options will be output to stdout.

To successfully use the manpages feature requires the manpages to be installed or on MANPATH, See man(1) for more details.

? -v, --version: Display version information for this tool, supported tctis and exit.

EXAMPLE

```
tss2_setappdata --path=HS/SRK/myRSACrypt --appData=appData.file
```

RETURNS

0 on success or 1 on failure.
