Rocky Enterprise Linux 9.2 Manual Pages on command 'tss2_writeauthorizenv.1'

$ man tss2_writeauthorizenv.1

tss2_writeauthorizenv(1)   General Commands Manual   tss2_writeauthorizenv(1)

NAME

    tss2_writeauthorizenv(1) -

SYNOPSIS

    tss2_writeauthorizenv [OPTIONS]

DESCRIPTION

    tss2_writeauthorizenv(1) - This command writes the digest value of a

    policy to an NV index such that this policy can be used in other poli?

    cies containing a corresponding PolicyAuthorizeNv element.

OPTIONS

    These are the available options:

    ? -p, --nvPath=STRING:

      The path of the NV index.

    ? -P, --policyPath=STRING:

      The path of the new policy.

COMMON OPTIONS

    This collection of options are common to all tss2 programs and provide

    information that many users may expect.

? -h, --help [man|no-man]: Display the tools manpage. By default, it

  attempts to invoke the manpager for the tool, however, on failure

  will output a short tool summary. This is the same behavior if the

  ?man? option argument is specified, however if explicit ?man? is re?

  quested, the tool will provide errors from man on stderr.   If the

  ?no-man? option if specified, or the manpager fails, the short op?

  tions will be output to stdout.

  To successfully use the manpages feature requires the manpages to be

  installed or on MANPATH, See man(1) for more details.

? -v, --version: Display version information for this tool, supported

  tctis and exit.

EAMPLE

    tss2_writeauthorizenv --nvPath=/nv/Owner/myNV --policyPath=/policy/pcr-policy

RETURNS

  0 on success or 1 on failure.
