Rocky Enterprise Linux 9.2 Manual Pages on command 'tuned-gui.8'

$ man tuned-gui.8

tuned-gui(8)   TuneD   tuned-gui(8)

NAME

    tuned-gui - graphical interface for configuration of TuneD

SYNOPSIS

    tuned-gui

DESCRIPTION

    tuned-gui is graphical interface for configuration of TuneD daemon. GUI

    allows user to easily create, remove or update TuneD profiles and load

    those profiles into TuneD. It is also possible to explore all available

    plugins and information about them, like their description or help for

    their configuration parameters.

TABS

    SUMMARY

        Display current active profile and configuration of plugins used

        by it.

    PROFILES

        Display available profiles and their origin (System | User).

        Profiles can be managed by 'create new profile', 'Edit' and 'Re?

move' buttons.

PLUGINS

Display available plugins and all accessible information about

them.
