Rocky Enterprise Linux 9.2 Manual Pages on command 'zlib_decompress.1'

\$ man zlib_decompress.1

ZLIB_DECOMPRESS(1) MySQL Database System ZLIB_DECOMPRESS(1)

NAME

zlib_decompress - decompress mysqlpump ZLIB-compressed output

SYNOPSIS

zlib_decompress input_file output_file

DESCRIPTION

The zlib_decompress utility decompresses mysqlpump output that was created using ZLIB compression.

Note

zlib_decompress is deprecated as of MySQL 8.0.34; expect it to be removed in a future version of MySQL. This is because the associated mysqlpump utility is deprecated as of MySQL 8.0.34.

Note

If MySQL was configured with the -DWITH_ZLIB=system option, zlib_decompress is not built. In this case, the system openssl zlib command can be used instead.

Invoke zlib_decompress like this:

zlib_decompress input_file output_file

Example:

```
mysqlpump --compress-output=ZLIB > dump.zlib
```

```
zlib_decompress dump.zlib dump.txt
```

To see a help message, invoke `zlib_decompress` with no arguments.

To decompress `mysqlpump` LZ4-compressed output, use `lz4_decompress`. See `lz4_decompress(1)`.
