Windows 11 Help on 'FIND' command

C:\>HELP FIND

Searches for a text string in a file or files.

FIND [/V] [/C] [/N] [/I] [/OFF[LINE]] "string" [[drive:][path]filename[...]]

/V   Displays all lines NOT containing the specified string.

/C   Displays only the count of lines containing the string.

/N   Displays line numbers with the displayed lines.

/I   Ignores the case of characters when searching for the string.

/OFF[LINE] Do not skip files with offline attribute set.

"string"   Specifies the text string to find.

[drive:][path]filename

        Specifies a file or files to search.

If a path is not specified, FIND searches the text typed at the prompt

or piped from another command.
