## Windows 11 Help on 'REPLACE' command

*C:\>HELP REPLACE*

Replaces files.

REPLACE [drive1:][path1]filename [drive2:][path2] [/A] [/P] [/R] [/W]

REPLACE [drive1:][path1]filename [drive2:][path2] [/P] [/R] [/S] [/W] [/U]

[drive1:][path1]filename Specifies the source file or files.

[drive2:][path2]        Specifies the directory where files are to be

                        replaced.

/A                       Adds new files to destination directory. Cannot

                        use with /S or /U switches.

/P                       Prompts for confirmation before replacing a file or

                        adding a source file.

/R                       Replaces read-only files as well as unprotected

                        files.

/S                       Replaces files in all subdirectories of the

                        destination directory. Cannot use with the /A

                        switch.

/W                       Waits for you to insert a disk before beginning.

/U                       Replaces (updates) only files that are older than

                        source files. Cannot use with the /A switch.
