NAME

AptPkg::Policy – APT package version policy class

SYNOPSIS

use AptPkg::Policy;

DESCRIPTION

The AptPkg::Policy module provides an interface to **APT**'s package version policy.

AptPkg::Policy

The AptPkg::Policy package implements the **APT** pkgPolicy class.

An instance of the AptPkg::Policy class may be fetched using the `policy` method from an AptPkg::Cache object.

The following methods are implemented:

priority(*VER|FILE*)

Return the pin priority for the given *VER* (AptPkg::Cache::Version) or *FILE* (AptPkg:Cache::PkgFile) object.

candidate(*PKG*)

Returns the installation candidate version for *PKG*. Returns an AptPkg::Cache::Version object.

SEE ALSO

AptPkg::Cache (3pm), **AptPkg** (3pm).
