

**NAME**

Dpkg::Exit – program exit handlers

**DESCRIPTION**

The Dpkg::Exit module provides support functions to run handlers on exit.

**FUNCTIONS**

**push\_exit\_handler(\$func)**

Register a code reference into the exit function handlers stack.

**pop\_exit\_handler()**

Pop the last registered exit handler from the handlers stack.

**run\_exit\_handlers()**

Run the registered exit handlers.

**CHANGES****Version 1.01 (dpkg 1.17.2)**

New functions: **push\_exit\_handler()**, **pop\_exit\_handler()**, **run\_exit\_handlers()**

Deprecated variable: `@handlers`

**Version 1.00 (dpkg 1.15.6)**

Mark the module as public.
