NAME

Exporter::Shiny − shortcut for Exporter::Tiny

SYNOPSIS

```
use Exporter::Shiny qw( foo bar );
```

Is a shortcut for:

```
use base "Exporter::Tiny";
push our(@EXPORT_OK), qw( foo bar );
```

For compatibility with Sub::Exporter, the following longer syntax is also supported:

```
use Exporter::Shiny -setup => {
   exports => [qw( foo bar )],
};
```

DESCRIPTION

This is a very small wrapper to simplify using Exporter::Tiny.

It does the following:

*   Marks your package as loaded in `%INC`;

*   Pushes any function names in the import list onto your `@EXPORT_OK`; and

*   Pushes `"Exporter::Tiny"` onto your `@ISA`.

It doesn't set up `%EXPORT_TAGS` or `@EXPORT`, but there's nothing stopping you doing that yourself.

BUGS

Please report any bugs to <http://rt.cpan.org/Dist/Display.html?Queue=Exporter−Tiny>.

SEE ALSO

This module is just a wrapper around Exporter::Tiny, so take a look at Exporter::Tiny::Manual::QuickStart and Exporter::Tiny::Manual::Exporting for further information on what features are available.

Other interesting exporters: Sub::Exporter, Exporter.
