

## NAME

Exporter::Tiny – an exporter with the features of Sub::Exporter but only core dependencies

## SYNOPSIS

```
package MyUtils;
use base "Exporter::Tiny";
our @EXPORT = qw(froblicate);
sub frobnicate { ... }
1;

package MyScript;
use MyUtils "froblicate" => { -as => "frob" };
print frob(42);
exit;
```

## DESCRIPTION

Exporter::Tiny supports many of Sub::Exporter's external-facing features including renaming imported functions with the `-as`, `-prefix` and `-suffix` options; explicit destinations with the `into` option; and alternative installers with the `installer` option. But it's written in only about 40% as many lines of code and with zero non-core dependencies.

Its internal-facing interface is closer to Exporter.pm, with configuration done through the `@EXPORT`, `@EXPORT_OK` and `%EXPORT_TAGS` package variables.

If you are trying to **write** a module that inherits from Exporter::Tiny, then look at:

- `Exporter::Tiny::Manual::QuickStart`
- `Exporter::Tiny::Manual::Exporting`

If you are trying to **use** a module that inherits from Exporter::Tiny, then look at:

- `Exporter::Tiny::Manual::Importing`

## BUGS

Please report any bugs to <http://rt.cpan.org/Dist/Display.html?Queue=Exporter-Tiny>.

## SUPPORT

IRC: support is available through in the `#moops` channel on [irc.perl.org](http://www.irc.perl.org) <http://www.irc.perl.org/channels.html>.

## SEE ALSO

Simplified interface to this module: `Exporter::Shiny`.

Other interesting exporters: `Sub::Exporter`, `Exporter`.
