NAME

File::HomeDir::FreeDesktop – Find your home and other directories on FreeDesktop.org Unix

DESCRIPTION

This module provides implementations for determining common user directories. In normal usage this module will always be used via File::HomeDir.

This module can operate only when the command `xdg-user-dir` is available and executable, which is typically achieved by installed a package named `xdg-user-dirs` or similar.

One can find the latest spec at <https://specifications.freedesktop.org/basedir–spec/basedir–spec–latest.html>.

SYNOPSIS

```
use File::HomeDir;

# Find directories for the current user
$home     = File::HomeDir->my_home;          # /home/mylogin
$desktop  = File::HomeDir->my_desktop;
$docs     = File::HomeDir->my_documents;
$music    = File::HomeDir->my_music;
$pics     = File::HomeDir->my_pictures;
$videos   = File::HomeDir->my_videos;
$data     = File::HomeDir->my_data;
$config   = File::HomeDir->my_config;

# Some undocumented ones, expect they don't work – use with caution
$download    = File::HomeDir->my_download;
$publicshare = File::HomeDir->my_publicshare;
$templates   = File::HomeDir->my_templates;
$cache       = File::HomeDir->my_cache;
```
