

**NAME**

Font::TTF::Gloc – Offsets into Glat table for the start of the attributes for each glyph

**DESCRIPTION**

The Gloc table is a bit like the Loca table only for Graphite glyph attributes. The table has the following elements:

Version

Table format version

numAttrib

Maximum number of attributes associated with a glyph.

locations

An array of offsets into the Glat table for the start of each glyph

names

If defined, an array of name table name ids indexed by attribute number.

`$t->minsize()`

Returns the minimum size this table can be. If it is smaller than this, then the table must be bad and should be deleted or whatever.
