NAME

JSON::XS::Boolean – dummy module providing JSON::XS::Boolean

SYNOPSIS

```
# do not "use" yourself
```

DESCRIPTION

This module exists only to provide overload resolution for Storable and similar modules. It's only needed for compatibility with data serialised (by other modules such as Storable) that was decoded by JSON::XS versions before 3.0.

Since 3.0, JSON::PP::Boolean has replaced it. Support for JSON::XS::Boolean will be removed in a future release.
