

NAME

XtReservePropertyAtom, XtReleasePropertyAtom – maintain a cache of property atoms

SYNTAX

```
Widget XtReservePropertyAtom(Widget w);
```

```
void XtReleasePropertyAtom(Widget w, Atom atom);
```

ARGUMENTS

w Specifies the widget used to reserve the atom.

atom Specifies the atom whose reservation is to be released.

DESCRIPTION

XtReservePropertyAtom returns an atom that may be used for properties in conjunction with conversion requests from widget *w*. The atom returned will be unique for the display of the widget specified.
